

The variant ID and the genomic coordinates of the dPCR assay of are listed in the following table.

| KRAS amino acid change | COSMIC Identifier                         | KRAS coding sequence | Genomic coordinates (SNV) | Genomic coordinates (assay)   |
|------------------------|-------------------------------------------|----------------------|---------------------------|-------------------------------|
| G12R                   | COSV55497582, (Legacy Identifier COSM518) | NM_033360.4 c.34G>G  | GRCh38,12:25245394        | GRCh38,12:25245318...25245395 |
